- Product Ownership & Product Lifecycle Management
- Agile Product Ownership (Scrum, SAFe, Kanban, Hybrid)
- Project/Program Planning, budgeting & Governance
- Stakeholder & Vendor Management
- Data Analytics & Business Intelligence (PowerBI, R)
- ERP (JD Edwards) implementation & Upgrades
- CI/CD & DevOps for Product Delivery
- Risk Identification, Mitigation & Compliance
- Change Management & Continuous Improvement
- PI Planning
- CI/CD Pipeline Implementation
- Software Development Lifecycle (SDLC)
- Quality & Compliance Audits
- User Training Adoption & UAT
- Team Leadership & Mentoring
- AI & Machine Learning Fundamentals

TECHNICAL SKILLS

ERP: JD Edwards	
Project Management: JIRA, MS Project, PMP (PDU), Scrum Master, PRINCE2, ITIL, Monday.com	
Data Science & BI: R Programming, Power BI	
Databases: Oracle, SQL Server	
Programming Languages: C, C++, VB, COBOL, Java	
EAI Tools: IBM CrossWorlds, MQSeries	

- Led vendor coordination, stakeholder communication, and delivery governance across multiple concurrent initiatives.
 - Ensured adherence to SDLC processes, quality standards, audit requirements, and operational compliance frameworks.
 - Supported budget monitoring, effort estimation, milestone validation, and delivery approvals.
- Key Achievements:**
- Developed an **award-winning HR mobile app** used by 3,000+ employees, driving adoption and satisfaction.
 - Launched a **QR/Beacon-based attendance system**, reducing manual errors by 60% and achieving 99% accuracy.
 - Built CI/CD pipelines, cutting deployment cycles by 40% and enhancing release stability.
 - Delivered **\$1.5M+ savings** via automation and paperless workflows.
 - Increased team velocity and stakeholder confidence through Agile training modules and coaching.

Principal Consultant
Usha Martin – Dubai

Team Size: 12

Industry: IT Services
Apr 2014 – Sep 2014

Responsibilities:

- Acted as Scrum Master for ERP modernization and enterprise application delivery programs.
- Facilitated Agile ceremonies including sprint planning, daily standups, retrospectives, and sprint reviews.
- Defined ERP upgrade rollout strategy, coordinated deployment schedules, and managed cutover planning activities.
- Collaborated with technical teams, QA, infrastructure, and business stakeholders to ensure zero-disruption deployments.
- Managed delivery risks, dependency tracking, issue resolution, and stakeholder communication activities.
- Applied root-cause analysis and continuous improvement practices to improve delivery predictability and quality.

Key Achievements:

- Reduced average delivery timelines by approximately 30% through Agile process improvements.
- Successfully executed ERP upgrade deployment with zero critical business downtime.

Project Lead

Oracle – Bangalore

Team Size: 27

Industry: IT

Nov 2005 – Aug 2013

Responsibilities:

- Managed ERP implementation and enterprise application delivery programs for global clients across distributed delivery teams.
- Coordinated project schedules, testing cycles, UAT activities, release planning, and deployment governance.
- Led collaboration between development, QA, infrastructure, business, and support teams to ensure timely delivery.
- Managed delivery risks, escalations, dependency tracking, and stakeholder communications across multiple projects.
- Implemented KPI dashboards, reporting frameworks, and governance metrics to improve project transparency and executive visibility.
- Supported Agile delivery execution, issue resolution, and change management initiatives.

Key Achievements:

- Improved end-user adoption and operational visibility through enterprise reporting and dashboard initiatives.
- Enhanced delivery governance and stakeholder reporting across ERP implementation programs.

Associate – Projects
Covansys – Bangalore

Team Size: Individual Contributor

Industry: IT Services
Feb 2004 – Nov 2005

Responsibilities:

- Supported ERP rollout and enterprise application implementation projects.
- Coordinated user training, UAT support, and business adoption activities.
- Assisted in delivery coordination, issue tracking, and project support functions.
- Developed reporting dashboards and operational data insights for business users.
- Participated in quality assurance and project documentation activities.
